

## Harness the Power of Health Data Test New Solutions and Unlock Insights with Mathematica's Health Data Innovation Lab

In today's rapidly evolving health care ecosystem, access to accurate and action-ready data is more crucial than ever. Health organizations need access to data and insights that lead to important breakthroughs, improve care, and drive better results. Mathematica is committed to improving the health systems that families, friends, and communities rely on.

**Mathematica's Health Data Innovation Lab connects health care industry professionals like you with world-class data scientists, social scientists, and technologists to harness the power of health data to advance innovation, improve operations, and meet ambitious goals.** We help you address complex challenges within your health care organization—or tackle broader issues such as fragmented care, social determinants of health, and health care interoperability.

### Ways we can help:

**Navigating your data journey:** From ideation to implementation, we provide skilled guidance and support to ensure you can leverage your data in a meaningful way.

**Testing your models with fellow experts:** The Lab provides a secure and collaborative environment where health care industry professionals and data scientists can come together to experiment with artificial intelligence and other technologies and methodologies.

**Providing tools to take your models to the next level:** Innovations often come with unknowns. We reduce investment risks by combining cutting-edge tools, specialized expertise, and data assets to evaluate your model.
