Measures as a Service (MaaS) by Mathematica and Google: Health Digital Solutions

Measures as a Service: Advancing a Higher Standard of Care

Measures as a Service (MaaS) is a unique cloud-based quality measurement solution to advance your mission to improve standards of care while lowering costs. MaaS leverages the power of industry standard data formats and now the power of near real-time FHIR data models through its cloud-based measures workbench and a customizable user interface to meet your organization's needs.

Measuring quality in real-time

Improve performance and member outcomes by connecting data across the continuum of care to identify gaps and utilization at multiple levels, use data to improve the health of your patients, and identify deficiencies in near real-time and predict future priorities.

Measuring care delivery and patient outcomes
Access and monitor provider performance

Identify gaps in care in near real-time and predict future deficiencies

Leverage interoperability standards to monitor plan performance in near real-time

Insights into value-based care that promote action

/ Gain crucial insights into your plan performance to maximize revenue and reduce costs

/ Improve data exchange using FHIR data models

/ Optimize Medicare Advantage or other value-based care payment models through risk adjustment

/ Identify gaps in care and act quickly

/ Meet regulatory quality of care requirements

/ Increase efficiency and improve health outcomes quickly using FHIR data models

/ Compare provider and patient performance and identify opportunities for education or intervention

/ Customize measures with Mathematica experts to meet your institutional priorities

/ Leverage Mathematica's human-centered AI-based modeling, predictive, and prescriptive analytics

/ Address health equity and social determinants of health

Let's Progress Together. For more information contact John Stern, JStern@mathematica-mpr.com and Laura Kovach, LKovach@mathematica-mpr.com

About Mathematica

Mathematica is the insight partner that illuminates the path to progress for public- and private-sector change agents. Our health experts apply knowledge at the intersection of data, methods, policy, and practice, translating big questions into deep insights, policy transformation, quality improvement, efficiency, delivery, affordability, equity, and health care financing.
